

# ACA|NE Northern New England

Serving Maine,  
New Hampshire  
and Vermont

The Air Conditioning Association of New England (ACA/NE) is a not-for-profit trade association for heating, ventilating, air conditioning and refrigeration contractors. ACA/NE represents and serves companies in New England that design, install, service and repair air conditioning, heating, refrigeration, air purification, ventilating systems, plumbing, piping, sheet metal and energy management systems of all sizes and complexities. In addition, membership includes manufacturers of equipment, wholesalers and distributors of equipment, vocational and technical schools, and others with an interest in the HVAC/R industry.

ACA/NE has successfully served the needs of New England's southern states for many years. Now, we have been asked to expand services into the three northern states. The benefits are the same for all members, regardless of the state in which you operate. The difference, with the creation of the Northern New England Chapter is that events and programming will be held locally and the legislative and regulatory issues we tackle will be those that impact your business in your state.

We invite you to join the ACA/NE Northern New England Chapter and start taking advantage of the many benefits available today!

ACA/NE is not part of or affiliated with ACCA, which is a national association.

# ACA|NE Northern New England is dedicated to “raising the bar” for contractor excellence.

ACA|NE Northern New England offers educational opportunities through dinner meetings, seminars for business owners and managers, and training for technicians, as well as a membership with Service Roundtable and a professional association group 401(k) membership plan.

We are also strongly committed to monitoring legislative and regulatory issues and influencing public policy decisions in the best interests of the HVAC industry.

One of the first challenges ACA|NE Northern New England will tackle is outreach to bolster the labor pool needed to meet the new requirement to install 100,000 heat pump in Maine by 2025.

In addition, membership in ACA|NE Northern New England is a useful marketing tool, distinguishing your company as one committed to the highest standards.

Plus, ACA|NE Northern New England is the association that offers the networking opportunities you need to learn from and build contacts with others in the HVAC industry.

Membership with ACA|NE Northern New England is open to all companies who agree to observe our code of ethics. We are a diverse and open organization for contractors and run by contractors. We give you a forum to learn and discuss industry issues with your colleagues.

## Member Testimonial

“

ACA|NE Northern New England Chapter membership will be well worth the investment. ACA|NE programs are an excellent source for professional development, and the regulatory and legislative information is critical for my business.

”
